NSW WE MEAN BUSINESS

# Western Sydney Manufacturing Week

## 28 May – 1 June 2007

Innovation drives economic change and growth. Innovation stimulates business competitiveness and success. Western Sydney manufacturers readily embrace innovation and consequently are among the world leaders in areas of design, production, and distribution.

This long-standing commitment to innovation and continuous improvement is the product of investment in research and development, a highly skilled workforce, a helpful educational sector, and the encouragement and support of NSW Government programs and initiatives.

Now in its third year, Western Sydney Manufacturing Week is rapidly becoming a highlight of the manufacturing calendar in Australia.

**Western Sydney Manufacturing Week 2007 is designed especially for all manufacturers.**

The events and site-visits of Western Sydney Manufacturing Week 2007 focus on the interface between world-class manufacturing and innovation.

Western Sydney Manufacturing Week 2007 highlights and promotes the significance of the manufacturing sector to the Western Sydney, State and National economies.

### Workshops and seminars cover topics including:

- investing in research and development
- working smarter in all facets of business
- technology-driven changes to the global supply chain
- risks and opportunities associated with improving processes and enhancing capability
- applying and adapting innovative best practice ideas to local conditions.

### Western Sydney Manufacturing Leaders' Forum

Western Sydney Manufacturing Week 2007 begins on 28 May with the Western Sydney Manufacturing Leaders Forum. It is hosted by the Greater Western Sydney Economic Development Board. World-leading experts will discuss the major themes of Western Sydney Manufacturing Week 2007.

**Book a place now for a workshop, seminar or site visit designed to boost your business growth.**
